

SUSTAINABLE OLYMPIAD

Participant Guidelines

Practical advice for teams and mentors taking part in the Sustainable Olympiad 2026.

Before you register

- Form a team of 2–5 students with a mix of skills: science, design, writing and presenting.
- Find a mentor, usually a teacher, who can meet with you regularly.
- Read the rulebook and choose the category that excites your team most.

Preparing for Round 1

- Review the sustainability topics in the study guide on our Resources page.
- Practise with past quizzes and agree how your team will divide questions.
- Test your internet connection and device the day before.

Running your project in Round 2

- Start with a clear problem statement and measure your baseline before you change anything.
- Keep a project log with dates, data, photos and decisions.
- Involve your community: interview the people affected by the problem.
- Make your report and video accessible, with headings, alt text and captions.

Presenting at the Finals

- Tell a story: the problem, what you tried, what you measured and what you learned.
- Show real evidence. Judges value honest results, including failures.
- Rehearse answering questions and share speaking time across the team.

Need help?

Contact the organising team through the Contact page on our website. We are happy to answer questions from students, mentors and parents.
